

# PROCEEDINGS MARSIM 2006

25 – 30 June 2006  
The Netherlands

Organized and hosted by:  
Maritime Institute Willem Barentsz (MIWB), Terschelling

In cooperation with:  
Netherlands Defence Academy (NLDA), Den Helder,  
Maritime Research Institute Netherlands (MARIN), Wageningen  
Maritime Simulation Rotterdam (MSR), Rotterdam

## INDEX

Preface / S.J.Cross, Local Organizing Committee

Welcome to Terschelling / J. Visser, Mayor

Welcome to MIWB NHL University / H. Mensink, Board of Governors

Opening speech / Mrs C.Peys, Minister of Transport

### KEYNOTE PAPERS

K1 APPLICATION OF MARITIME SIMULATORS AND IMSF ACTIVITIES  
H.Kobayashi, Chairman IMSF

K2 STCW AND ASSESSMENT OF COMPETENCE BY SIMULATOR 10 YEARS ON  
P. Muirhead, Honorary member IMSF

### S PAPERS

S1. THE USE OF A SIMULATOR FOR THE DEVELOPMENT AND TRAINING OF  
OPTIMISED USE OF HARBOUR TUGS  
Capt. Max J. van Hilten, MNI, PortXS nautical research, development and  
consultancy, The Netherlands  
Dr Ir. Johan H.Wulder, Maritime Simulation Rotterdam (STC Ltd), The  
Netherlands

**S2. A STUDY ON HUMAN CHARACTERISTICS IN BERTHING MANEUVER AND DEVELOPMENT OF THE SHIP HANDLING SUPPORT SYSTEM**

Atsushi Ishibashi, Tokyo University of Marine Science and Technology, Japan  
Hiroaki Kobayashi, Tokyo University of Marine Science and Technology,  
Japan

**S3. SIMULATION OF THE DYNAMICS OF A TUG TOWING A DISABLED TANKER IN EMERGENCY SALVAGE OPERATION**

K.S. Varyani, Department of Naval Architecture and Marine Engineering,  
Universities , Glasgow and Strathclyde, Scotland  
N. Barltrop, Department of Naval Architecture and Marine Engineering,  
Universities, Glasgow and Strathclyde, Scotland  
X. Pham, Department of Naval Architecture and Marine Engineering  
Universities, Glasgow and Strathclyde, Scotland  
K. van Essen, SMIT, Rotterdam, The Netherlands  
R. Doyle, British Maritime Technology, Teddington, England  
L.Speller, British Maritime Technology, Teddington, England

**S4. TUG SIMULATION TRAINING – REQUEST FOR REALISM AND ACCURACY**

Peter Kr. Sørensen, Head of Training, Ports and Human Factors Department,  
FORCE Technology, Division for Maritime Industry, Denmark

**S5. THE SIMULATION RESULTS OF TUG OPERATION IN HARBOUR MANOEUVRING**

Szymonski, Poland

**S6. THE DEVELOPMENT OF SHIP SIMULATION ASSESSMENT TO COMPLEMENT WRITTEN MARITIME EXAMINATIONS IN IRELAND**

Bill Kavanagh, National Maritime College of Ireland

**S7. MARINER'S FUNCTION FOR SAFE NAVIGATION**

Hiroaki Kobayashi, Tokyo University of Marine Science and Technology,  
Japan

**S8. UNDERSTANDING HUMAN ERROR PATTERNS BY ANALYSING SIMULATOR TRAINING RECORDS**

Hideyuki Ando, Tokyo, Japan

**S9. STUDY ON ON-BOARD SHIP-HANDLING SIMULATOR APPLIED REAL TIME AIS INFORMATION**

Y. Arai, Japan

**S10. SHIP MANEUVERING SIMULATION BASED SAFETY ANALYSIS FOR VESSEL TRAFFIC ENVIRONMENT**

Jun-Min Mou, Wuhan University of Technology, P.R. China  
Zao-Jian Zou, Shanghai Jiao Tong University, P.R. China  
Li-Wen Huang, Wuhan University of Technology, P.R. China  
Yong-Qing Ji, Zhejiang Vocational Institute of Technology, P.R. China

**S11. THE METHOD OF NAVIGATIONAL RISK ASSESSMENT ON WATERWAYS**

BASED ON GENERALISED REAL TIME SIMULATION DATA  
Lucjan Gucma, Maritime University of Szczecin, Poland

S12. NUMERICAL INVESTIGATION ON MOTION SICKNESS EVALUATION OF A  
HIGH SPEED FERRY

Dr C. C. Fang, National Taiwan Ocean University, Taiwan  
Mr M.Y. Chen, National Taiwan Ocean University, Taiwan  
Dr S.K. Chou, United Ship Design & Development Centre, Taiwan

S13. FRUSTRATION AND REGRESSION – AN EXPERIMENTAL STUDY OF A  
PARADIGM FOR HUMAN RELIABILITY AND TRAINING

Dr Marc Schütte, University of Bremen, Germany

S14. A STUDY ON MARINERS' BEHAVIOR FOR AVOIDING COLLISIONS IN  
CONGESTED TRAFFIC CONDITIONS: A STUDY ON THE CAUSES OF  
COLLISIONS UNDER RESTRICTED VISIBILITY

Tomohisa Nishimura, Japan Coast Guard, Japan  
Hiroaki Kobayashi, Tokyo University of Marine Science and Technology, Japan

S15. LOW COST THREE DEGREES OF FREEDOM MOTION PLATFORM FOR  
HIGH SPEED CRAFT SIMULATOR

Norvald Kjerstad, Aalesund University College, Norway  
Webjorn Rekdalsbakken, Aalesund University College, Norway

S16. A CONCEPTUALLY NEW TYPE OF SIMULATOR FOR ADVANCED  
OFFSHORE OPERATIONS AND ANCHOR HANDLING

O. Bjorneseth, Norway

S17. INTEGRATION OF SHIP BRIDGE SIMULATOR AND ENGINE ROOM  
SIMULATOR

Trond Fykse Tveit, Kongsberg Maritime, Norway  
Jarle Thorstensen, Kongsberg Maritime, Norway  
Lars Markusson, Kongsberg Maritime, Norway

S18. USING SHIPHANDLING BRIDGE SIMULATORS TECHNICALLY  
CONNECTED TO ENGINE SIMULATORS

Asc. Professor Poul Vibsig Pedersen, Svendborg International Maritime  
Academy, Denmark

S19. SIMULATION OF SHIP ELECTRIC NETWORKS

H.T. Grimmelius PhD Msc MIMarEST CEng, Delft University of Technology,  
The Netherlands

S20. STANDARD MARINER'S BEHAVIOR IN AVOIDING COLLISION MANEUVER

Research Group on Mariner's Factor  
Hiroaki Kobayashi: Project Coordinator of IMSF research project, Japan

S21. ACCESSIBILITY STUDY OF SAN BELTRAN BASIN THROUGH NORTHERN  
MOUTH USING A MANOEUVRING SIMULATOR (BARCELONA PORT)

J.M. Montero, R. Atienza, O. Ortega, E. Diaz, Centro de Estudios de Puertos y Costas-CEDEX, Spain

S22. DEVELOPMENT OF AUGMENTED REALITY & VIRTUAL OCEAN ENVIRONMENT FOR ROV OPERATION AND TRAINING

C.M.Lee, Korea

S23. THE DESIGN OF AIS SIMULATION TRAINING PROGRAM FOR AIS OPERATORS

Bao Junzhong, Gu Xuehua, Dalian Maritime University, P.R. China

S24. MARITIME INCIDENT MANAGEMENT SYSTEM (MIMS)

Lt Cdr Jack Hickey, Naval Service, Ireland

Gisle A H Fiksdal, Lodic, Norway

S25. DEVELOPMENT OF ONBOARD SHIP HANDLING SIMULATOR

Hikaru Kamiirisa, Takashi Kishimoto, Akishima Laboratories (MITSUI ZOSEN) Inc., Japan

Masato Kikuchi, Shuji Ueki, Kazuhiko Kanehiro, Mitsui Engineering Shipbuilding Co, Ltd, Japan

S26. BRM TRAINING AND ITS QUANTITATIVE EVALUATION

Kinzo Inoue, Faculty of Maritime Sciences, Kobe University, Japan

Hiroko Takahashi, Faculty of Maritime Sciences, Kobe University, Japan

Tomoki Kuwano, Japan Institute of Human Factors, Japan

S27. A STUDY ON EFFECTIVE TRAINING METHODS USING FULL-MISSION ENGINE ROOM SIMULATOR, PROPOSAL AND VERIFICATION OF ENGINE ROOM SIMULATOR TRAINING PROGRAM -

Kondo Koichi, Marine Technical College, Japan

S28. EXPERIMENTAL VERIFICATION ON GENERAL MANEUVERING METHOD BY HUMAN OPERATORS

Makoto Endo, Toyama National College of Maritime Technology, Japan

S29. DYNAMIC BEHAVIOR OF A TANKER AND A TUG IN A RIVER

Prof. Haruzo Eda, US Merchant Marine Academy, USA

Dr Eugene Guest, Marine Safety International, USA

Dr Takeshi Matsuoka, National Maritime Research Institute, Japan

Dr Hiroko Itoh, National Maritime Research Institute, Japan

S.30 DEVELOPMENT OF COLLISION AND GROUNDING RISK MONITORING SYSTEM OF A SHIP BY USING FUZZY ALGORITHM AND ENVIRONMENTAL STRESS MODEL

Nam-Sun Son, Maritime and Ocean Engineering Research Institute/ KORDI, Korea

In-Young Gong, Maritime and Ocean Engineering Research Institute/ KORDI, Korea

Sun-Young Kim, Maritime and Ocean Engineering Research Institute/ KORDI, Korea

S31. A THREE-DIMENSIONAL VIEWING MONITOR USING NETWORK SYSTEM BETWEEN A SHIP AND THE SHORE VIA A SATELLITE

H. Usui, Japan

S32. STUDY ON SKILLS ASSESSMENT BY SIMULATOR

H. van Ginkel, The Netherlands

S33. INTEGRATING SHIP-HANDLING AND CRISIS MANAGEMENT SIMULATORS CREATING A NEW PARADIGM

P. B. Arms, USA

S34. FIRST RESULTS FROM PRACTICAL USAGE OF COMPLEX MARITIME SYSTEM SIMULATOR CENTRE IN CONNECTION WITH REAL EQUIPMENT

Marko Perkovic, Valter Suban, Stojan Petelin, Matej David, University of Ljubljana, Faculty of Maritime Studies and Transportation, Slovenia

S35. DEVELOPING INNOVATIVE SOLUTIONS FOR EFFECTIVE SHIP-HANDLING TRAINING

Captain Ashok Mulloth, Mr Prakash Xavier, Singapore Maritime Academy, Singapore

## **M PAPERS**

M1. SHIP-SHIP-INTERACTION: OVERTAKING AND ENCOUNTERING OF INLAND VESSELS ON SHALLOW WATER

Dr Andreas Gronarz, (DST) Development Centre for Ship Technology and Transport Systems, Germany

M2. SHIP MANOEUVRING CHARACTERISTICS AS FUNCTION OF SHIP FORM IN SHALLOW WATER

Sungwook Lee, Kyushu University, Japan  
Katsuro Kijima, Kyushu University, Japan  
Yoshitaka Furukawa, Kyushu University, Japan  
Yasuaki Nakiri, Kyushu University, Japan

M3. PREDICTION OF SHIP MANOEUVRABILITY OF AN 800 TEU CONTAINERSHIP IN DEEP AND SHALLOW WATER: MATHEMATICAL MODELLING AND CAPTIVE MODEL TESTING

Katrien Eloot, Flanders Hydraulics Research, Belgium  
Marc Vantorre, Ghent University, Belgium  
Guillaume Delefortrie, Ghent University, Belgium

M4. CFD WITH PMM TEST VALIDATION FOR MANOEUVRING VLCC2 TANKER IN DEEP AND SHALLOW WATER

Claus D. Simonsen, FORCE Technology, Denmark  
Fred Stern, IIHR, University of Iowa, USA  
Kristian Agdrup, FORCE Technology, Denmark

**M5. PERFORMANCE EVALUATION OF SCHILLING RUDDER AND MARINER  
RUDDER FOR PURE CAR CARRIERS (PPC) UNDER WIND CONDITION**

Kazuhiko Hasegawa, Osaka University, Japan  
Vishwanath Nagarajan, Osaka University, Japan  
Dong-Hoon Kang, Osaka University, Japan

**M6. TURNING MOTION OF A SHIP WITH SINGLE CPP AND SINGLE RUDDER  
DURING STOPPING MANEUVER UNDER WINDY CONDITION**

Hideo Yabuki, Tokyo University of Marine Science and Technology, Japan  
Yasuo Yoshimura, Faculty of Fisheries Sciences, Hokkaido University, Japan  
Tsuyoshi Ishiguro, IHI Marine United Inc., Japan  
Michio Ueno, National Maritime Research Institute, Japan

**M7. A STUDY ON THE MANOEUVRABILITY OF TWIN-SKEG CONTAINER SHIP**  
S.Y. Kim, Korea

**M8. THE APPLICATION OF REAL-TIME MANOEUVRING SIMULATOR FOR A  
HARBOUR DESIGN**

Captain John S.Y. Chang, National Taiwan Ocean University, Taiwan  
Dr C.C. Fang, National Taiwan Ocean University, Taiwan  
Mr Sin Der Lee, National Taiwan Ocean University, Taiwan

**M9. NEW CAPABILITIES FOR THE MATHEMATICAL MODELLING OF A SHIP  
MOTION IN NTPRO 4000 SIMULATOR**

A. D. Speransky, Transas Technologies Ltd, Russian Federation

**M10. A STUDY ON MANEUVERABILITY OF VLCC INSTALLED WITH MARINER  
TYPE VEC-TWIN RUDDER**

Dong-Hoon Kang, Osaka University, Japan  
Kazuhiko Hasegawa, Osaka University, Japan  
Kenjiro Nabeshima, Japan Hamworthy Co Ltd, Japan

**M11. MODELLING AND SIMULATION TECHNOLOGIES FOR NAVAL SHIP  
DESIGN AND THEIR APPLICATION**

C.H.Lee, Korea

**M12. OPTIMAL INPUT DESIGN FOR THE IDENTIFICATION OF LOW-SPEED  
MANOEUVRING MATHEMATICAL MODEL**

Seong Mo Yeon, Hyundai Mipo Dockyard, Korea  
Dong Jin Yeo, MOERI/KORDI, Korea  
Key Pyo Rhee, Seoul National University, Korea

**M13. A UNIFIED NONLINEAR MATHEMATICAL MODEL FOR SIMULATING SHIP  
MANOEUVRING AND SEAKEEPING IN REGULAR WAVES**

Serge Sutulo, Unit for Marine Technology and Engineering, Instituto Superior  
Técnico, Portugal  
C. Guedes Soares, Unit for Marine Technology and Engineering, Instituto  
Superior Técnico, Portugal

- M14. A NON-UNIFORM CURRENT IN SHIP MANOEUVRING  
Jaroslaw Artyszuk, Maritime University of Szczecin, Poland
- M15. THE MOVING MATHEMATICAL MODELS OF TUG WITH VOITH SCHNEIDER PROPELLER  
Zhang Xiufeng, Nautical College, Dalian Maritime University, China  
Yin Yong, Nautical College, Dalian Maritime University, China  
Jin Yicheng, Nautical College, Dalian Maritime University, China
- M16. COURSE KEEPING AND MANOEUVRING OF HIGH-SPEED VESSELS  
F.Quadvlieg, The Netherlands
- M17. MODELING OF SHIP MOTIONS IN RESTRICTED CHANNELS ON MARINE SIMULATORS  
Dr Vladimir Ankudinov, Transas USA Inc, USA  
Igor I. Filippov, Transas Technology Ltd, Russian Federation
- M18. MARITIME TRAFFIC SAFETY ASSESSMENT FOR BUSAN NEW PORT BY USING SHIPHANDLING SIMULATOR SYSTEM  
In-Young Gong, Chan-Su Yang, Yeon-Gyu Kim, Chang-Min Lee, Young-Hun Yang, So-young Kim, Maritime & Ocean Engineering Research Institute/KORDI, Korea  
Sun-A Kim, Super Century Co Ltd, Korea
- M19. COMBINING FAST-TIME SIMULATION AND AUTOMATIC ASSESSMENT FOR OPTIMISING TUNING OF SIMULATOR SHIP MODELS  
K. Benedict, M.Baldauf, M.Kirchhoff, W. Koepnick, R. Eyrich, Hochschule Wismar, University of Technology, Business and Design, Dept. of Maritime Studies Warnemuende, Germany
- M20. STUDY ON MANEUVERING MODEL OF KAMEWA-TYPE WATERJET SHIP FOR SHIPHANDLING SIMULATOR  
Junsheng Ren, Dalian Maritime University, P.R. China  
Yong Yin, Dalian Maritime University, P.R. China  
Xiufeng Zhang, Dalian Maritime University, P.R. China
- M21. DEVELOPMENT OF MATHEMATICAL MODEL OF A VOITH SCHNEIDER TUG AND EXPERIENCE FROM ITS APPLICATION IN AN OFFSHORE SIMULATION STUDY  
Kristian Agdrup, FORCE Technology, Denmark  
Anders S. Olsen, FORCE Technology, Denmark  
Dirk Jürgens, Voith Turbo Marine GmbH, Germany
- M22. CONTROLLABILITY AT TOO HIGH SPEEDS IN TOO SHALLOW WATER  
Albert J. Jurgens, MARIN, The Netherlands  
Arie de Jager, IHC HOLLAND Dredgers BV, The Netherlands
- M23. GUIDE TO NEW GENERIC EQUATIONS FOR INTERACTION FORCES/MOMENTS BETWEEN MOORED-PASSING SHIP AND BETWEEN ENCOUNTER-OVERTAKING-OVERTAKEN SHIPS

Kamlesh S. Varyani, Naval Architecture and Marine Engineering, Universities of Glasgow and Strathclyde, UK

**M24. PREDICTION OF THE MANOEUVRABILITY ON A SHIP WITH A CRP POD PROPULSION SYSTEM AND AN AUXILIARY RUDDER**

Tomihiro Haraguchi, National Maritime Research Institute NMRI, Japan  
Jun Kayano, National Maritime Research Institute NMRI, Japan  
Yoshiaki Tsukada, National Maritime Research Institute NMRI, Japan

**M25. DEVELOPMENT OF CRITERIA FOR CERTIFICATION OF THE MATHEMATICAL MODELS USED BY MARINE SIMULATORS**

Dr M.P. Lebedeva, NAVIS, St-Petersburg, Russia  
Prof. A.D. Gofman, SUWC, St-Petersburg, Russia  
Dr Y.V.Yatsuk, SUWC, St-Petersburg, Russia  
A.V. Vladimirez, Russian Register, St-Petersburg, Russia  
S. D. Aysinov, Admiral Makarov State Maritime Academy, St-Petersburg  
Dr B.V.Afanasiev, Marine Merchant Academy, Russia  
Dr V.K. Ankudinov, Transas USA Inc, US  
Dr L.L. Daggett, Waterway Simulation Technology, USA  
A.C. Landsburg, US Maritime Administration, USA

**M26. ON MANOEUVRING AND CONTROL OF LARGE HIGH-SPEED POD DRIVEN SHIPS IN WAVES**

Zafer Ayaz, Department of Naval Architecture and Marine Engineering, Universities of Glasgow and Strathclyde, Scotland  
Osman Turan, Department of Naval Architecture and Marine Engineering, Universities of Glasgow and Strathclyde, Scotland

**M27. PREDICTION OF SHIP DYNAMIC STABILITY USING A NURBS-BASED HIGHER ORDER PANEL METHOD**

Hua-Ming Wang, Shanghai Jiao Tong University, China  
Zao-Jian Zou, Shanghai Jiao Tong University, China

**M28. THRUSTER-THRUSTER INTERACTION FOR MANOEUVRABILITY EVALUATION**

S. Reinders Msc, Nevesbu, the Netherlands  
H.T. Grimmelijs PhD Msc Bsc, Delft University of Technology, The Netherlands  
J.T. Ligtelijn MSc, Wärtsilä Propulsion Netherlands BV, The Netherlands  
J. Moulijn PhD MSc, Wärtsilä Propulsion Netherlands BV, The Netherlands

**M29. ON THE DEVELOPMENT OF AUTOMATIC NAVIGATION SYSTEM FOR SHIPS**

Yositaka Furukawa, Kyushu University, Japan  
Katsuro Kijima, Kyushu University, Japan  
Hiroshi Ibaragi, Kyushu University, Japan

**M30. STUDY ON MANEUVRING MATHEMATICAL MODEL FOR TRAWLER**

Xiaofeng Sun, Dalian Maritime University, P.R. China  
Yong Yin, Dalian Maritime University, P.R. China

Xiufeng Zhang, Dalian Maritime University, P.R. China

**M31. COMPARATIVE MANOEUVRABILITY TESTS OF CONVENTIONAL AND POD PROPULSION FOR A GAS CARRIER**

L. Kobylinski, Poland

**BACKGROUND PAPERS**

**B1. DEVELOPMENT OF INSTRUCTOR OPERATION SOFTWARE FOR SIMULATOR SYSTEM OF NAVAL USE**

Han-Jin Lee, Chang-Min Lee, Gycong-Joong Lee, Sun-Young Kim, In-Young Gong, Korea Ocean Research Development Institute, Korea

**B2. COMPARISON OF THE FREQUENCY OF UNSAFE SHIP-HANDLING SITUATIONS AND THE FREQUENCY OF MARINE ACCIDENTS AT THE KURUSHIMA STRAIT**

Masaru Yasuda, Japan Marine Science Inc., Japan  
Kinzo Inoue, Kobe University, Japan  
Hideo Usui, Kobe University, Japan

**B3. AN EXPERIMENTAL STUDY ON THE DIRECTIONAL STABILITY OF TOWED FPSO**

Heejoon Yang, SSMB, Samsung Heavy Industries Co, Ltd, Korea  
Chunbeom Hong, SSMB, Samsung Heavy Industries Co, Ltd, Korea

**B4. PHYSICALLY BASED MANEUVERING MODEL FOR SIMULATIONS AND TEST EVALUATIONS**

Dr Vladimir Ankudinov, Transas USA Inc., USA  
Bent K.Jakobsen, Computer Sciences Corporation, USA
